## **DETAILED ACTION**

### ***Drawings***

1. The drawings are objected to under 37 CFR 1.83(a) because they fail to show the safety device as described in the specification. Any structural detail that is essential for a proper understanding of the disclosed invention should be shown in the drawing. MPEP § 608.02(d). A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

### ***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 17-36 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

On page 1, last paragraph, a "safety device" is described as "any component that can be integrated into the set of cutters and that permanently prevents the operator from sustaining finger injuries, especially caused by rotating blades". This description of the safety device is insufficient to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. Furthermore, there is nothing shown in any of the drawings to further shed light on what this safety device is specifically composed of. Finally, there appears to be know specific structure shown or describe in the specification that would clarify the composition of this safety device.

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 17-36 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 17, lines 1 and 2, the phrase “cutters displaying” and “cutters displays” are both considered to be vague and indefinite claim language.

In claim 18, lines 1 and 2, the phrase “where it can only be put into operation” is also considered to be vague and indefinite claim language.

In claim 19, line 2, the phrase “a hole diameter  $\leq 6$ ” is also considered to be vague and indefinite claim language.

The vague and indefinite language set forth in the claims are too numerous to list, these are just some examples noted above. Applicant should review the claims in their entirety in order to correct any and all vague and indefinite claim language.

6. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

7. Claims 35 and 36 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claims 35 and 36, because of their dependency on previous apparatus claims, it is not clear as to whether an apparatus or method is being claimed.

8. Claims 17-36 are rejected as failing to define the invention in the manner required by 35 U.S.C. 112, second paragraph.

The claim(s) are narrative in form and replete with indefinite and functional or operational language. The structure which goes to make up the device must be clearly and positively specified. The structure must be organized and correlated in such a manner as to present a complete operative device

***Claim Rejections - 35 USC § 102***

9. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

10. Claims 17-36 are rejected under 35 U.S.C. 102(b) as being anticipated by Haack et al.

Haack et al discloses the invention as can be best understood in view of the numerous 35 USC 112, first and second paragraph rejections set forth above.

***Conclusion***

11. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Weiler et al is being cited for showing a similar comminuting mechanism to that of the applicant.
